USER GUIDE

WELCOME

Thank you for choosing the Snapper camera phone. This sleek new handset features a fashionable clamshell design with dual LCD screen displays. The one inch black and white sub-display screen on the outside allows you to quickly view incoming calls, message alerts or date and time functions, while the 65K 1.8″ color main screen on the inside clearly displays pictures, graphics and text.

Equipped with today's most popular features, this stylish phone has a built-in CMOS 310K pixel camera with embedded flash for quick and easy pictures, day or night. It contains a MSM6050 chipset that allows for high-speed communication services such as wireless Internet access, messaging and image transmissions. It has a WAP 2.0 browser and is Java enabled, which allows you to download wallpapers, screensavers, games, ringtones and more. It supports text and picture messaging services so that you can send and receive messages in a variety of forms. In addition, it supports MIDI, MP3 or QCELP audio formats and JPG or PNC image graphics so that you can enjoy a rich multimedia experience.

This easy-to-use phone also features a two-way speakerphone and voice activated dialing for hands-free operation, has T9 predictive text input for quick text entries, displays up to 9 lines of text input, contains a 300-entry phone book for handy contacts access, is TTY/TDD compatible and supports English languages.

The Snapper camera phone is for the next generation of mobile handset users that need voice and data to stay connected today.

IMPORTANT INFORMATION

This Snapper user guide contains very important information about how to handle and use the phone. So please read this manual thoroughly, pay attention to the warranty on the back page and be alert to the exclusions and limitations of your warranty, which are related with the unauthorized use of components.

Ⓝ	**VirginXL** Phone is in the progress of VirginXL.	
☎	**TTY Mode** Indicates your phone's TTY mode is active. Indicates your phone is out of TTY service area.	

9

BATTERY INSTALLATION

1 ❶ Place the battery on the back of the handset and slide into place. ❷ Push the battery down until it locks into place.
BATTERY REMOVAL

1 ❶ Pull down the release latch, lift up the battery and ❷ remove the battery from the handset.
NOTE *If the battery is not correctly placed in the compartment, the handset will not turn on and/or the battery may detach during use.*

BATTERY CHARGING

POWER CONNECTION

1 Plug the AC Charger into a standard outlet.

2 Plug the other end of the AC Charger into the bottom of your phone. The battery must be installed onto the phone.
NOTE
- *When you charge the battery with the phone power off, you will see a charging status screen. You cannot operate the phone until it is powered on.*
- *The battery is not charged at the time of purchase.*
- *Fully charge the battery before use.*
- *It is more efficient to charge the battery with the handset powered off.*
- *The battery must be connected to the phone in order to charge it.*
- *Battery operating time gradually decreases over time.*
- *If the battery fails to perform normally, you may need to replace the battery.*

BATTERY TALK TIME

The operating time is subject to your handset usage and configuration.

BATTERY CAPACITY	
Standard Battery (1000mAh)	Up to 3 hours
Extended Battery (1800mAh)	Up to 5 hours

BATTERY STANDBY TIME

The operating time is subject to your handset usage and configuration.

BATTERY CAPACITY	
Standard Battery (1000mAh)	Up to 190 hours
Extended Battery (1800mAh)	Up to 300 hours

NOTE *These times are for a new battery. Talk and Standby time may decrease over time.*

DOs

- Only use the battery and charger approved by the manufacturer.
- Only use the battery for its original purpose.
- Try to keep batteries in a temperature between 41ºF (5ºC) and 95ºF (35ºC).
- If the battery is stored in temperatures above or below the recommended range, give it time to warm up or cool down before using.
- Completely drain the battery before recharging. It may take one to four days to completely drain.
- Store the discharged battery in a cool, dark, and dry place.
- Purchase a new battery when its operating time gradually decreases after fully charging.
- Properly dispose of the battery according to local laws.

DON'Ts

- Don't attempt to disassemble the battery – it is a sealed unit with no serviceable parts.
- Don't accidentally short circuit the battery by carrying it in your pocket or purse with other metallic objects such as coins, clips and pens. This may critically damage the battery.
- Don't leave the battery in hot or cold temperatures. Otherwise, it could significantly reduce the capacity and lifetime of the battery.
- Don't dispose of the battery into a fire.

Chapter 2

BASIC OPERATION

This chapter addresses and explains the basic features of your cellular telephone including:

- TURNING THE PHONE ON / OFF
- ACCESSING THE MENU
- MENU SUMMARY
- BASIC FUNCTIONS
- DURING A CALL
- MAKING AN EMERGENCY CALL

TURNING THE PHONE ON

1 Press and hold 📞, until "Power On" Logo appears and the tone sounds.

> ⚠️ • If "Password" appears on the display, enter your 4-digit password to unlock your phone.
> • The default password is the last 4 digits of your phone number.

TURNING THE PHONE OFF

1 Press and hold 📞, until your "Power Off" Logo appears.

> NOTE • Immediately change or recharge the battery when "Low Battery Warning Power Off" appears on the display. Memory may possibly be damaged if the phone turns off due to the battery completely draining.
> • Turn the phone off before removing or replacing the battery. If the phone is on, unsaved data may be lost.

Your Snapper Telephone can be customized via the menu. Each function can be accessed by scrolling with the Navigation Key or by pressing the number that corresponds with the menu item.

Pictures	**Contacts**
My Account	**Recent Calls**
Messaging	**Tools**
VirginXL	**Settings**
My Stuff	
1 To access the menu in the idle mode, press ⬜ [MENU].

2 To scroll through the menu options use the Navigation Key.

> ● To search through the menu in numerical order, press the Navigation Key down.

3 To return to the previous page, press ⬛ Back. To exit the current menu and return to the idle mode, press 📞.

4 Press (OK) to enter a function when its main page is displayed or press its assigned number to have direct access to the function.

> NOTE **Hotkeys**
> At the main screen, press and hold the Navigation Key as follows to access these functions:
> • Up : My Account
> • Down : Recent Calls
> • Right : Text Message
> • Left : VirginXL

⬤ MAKING A CALL

1 Enter a phone number.

NOTE

To modify the phone number you have entered:
- *To erase one digit at a time press* `Back` *.*
- *To erase the entire number, press and hold* `Back` *.*

C H 2

2 Press ⬤ .
The indicator 📶 , appears on the display.

NOTE

- *If "CALL FAILED" appears on the display or the line is busy, press 📵 or ⬤ .*
- *If you activate the "AUTO RETRY" function, the phone will automatically redial for the number of times you have selected. (Refer to page 84).*
- *When you place or receive a call from stored phone numbers, both the name and phone number will be displayed.*
- *There is another way to make a call through the VR mode, which is called "VAD (Voice Activated Dialing)".*
  Please refer to page 65 (Voice Service) for more details.

3 To end a call, press 📵 .

SPEAKERPHONE

The speakerphone feature lets you listen to audio through the speaker and talk without holding the phone.

1 To activate the speakerphone in idle, answering or calling modes, press 🔟 .

2 The phone returns to normal (speakerphone off) after ending a call or when the phone is turned off and back on.

PAUSE FEATURE

Pauses are used for automated systems (i.e., voicemail, calling cards). Insert a pause after a phone number then enter another group of numbers. The second set of numbers is dialed automatically after the pause. This feature is useful for dialing into systems that require a code.

1 To insert a pause, enter a phone number then press ⬜ [OPTIONS]. Select either a Hard pause ("P" appears) or a Timed pause ("T" appears).

2 Press ⬜ to dial or ⬜ [SAVE] to store. Please refer to page 30 for more details about storing a phone number.

ANSWERING A CALL

1 To answer a call, press any key except 📞 , ⬜ , ⬜ or ⬜ .

● By pressing ⬜ ⬜ ⬜ ⬜ , you can select either "Any Key" or "Send Key" to answer a call. If "Send Key" is selected, the phone can only be answered by pressing ⬜ . See page 83 for more information.

2 To end the call, press 📞 .

NOTE *In Auto Answer Mode a call is automatically answered after a preset time of ring tones. See page 84 for more details.*

CALLER ID FUNCTION

Identifies caller by displaying their phone number. If the caller's name and number are already stored in your Contacts, they both will appear.

NOTE *The caller ID is stored in the Recent Calls.*

CH 2

CALL WAITING FUNCTION

Notifies you of an incoming call when you are already on a call by sounding a beep tone and displaying the caller's phone number.

1 To answer another call while on the phone, press ☜ . This places the first call on hold. To switch back to the first caller, press ☜ again.

NOTE *Call Waiting is a system dependent feature. Please contact your service provider for details.*

ADJUSTING VOLUME

Adjusts the volume of the ringtone, voice call, key beep and speaker.

1 Press ⊟ [MENU] then select one of the following.

- Ringtones : Controls the ringtone volume.
- Key tone : Controls the key pad tone.
- Voice call : Controls the earpiece volume.
- Speaker Phone: Controls the speaker volume.

2 Adjust volume then press ⊙ [OK] to save it.

NOTE *To adjust earpiece volume during a call, press the Navigation Key up or down. Or side volume key up or down.*

C
H
2

SILENCER

Mutes key tones and activates the vibration mode to alert you of an incoming call or message.

1 To turn Silencer mode on/off, press and hold ☜ . ▦ will be displayed to indicate Silencer mode is active.

C
H
2

To display menu options during a call, press ⊟ [OPTIONS].

MUTE (UNMUTE)

The caller cannot hear you or any sounds from your phone but you can still hear them.

1 Press ⊟ [MENU] 🔘 .

- To deactivate, press ⊟ [MENU] 🔘 .
- The phone will automatically unmute in Emergency Call or Callback mode.

MESSAGING

Enables you to send a message (SMS) during a call.
(Refer to page 95 for more details.)

1 Press ⊟ [MENU] 2ᴬᴮᶜ .

MY PHONE

Enables you to view your phone number while on a call.

1 Press ⊟ [MENU] 3ᴰᴱᶠ .

This 911 feature puts the phone in the Emergency Call Mode when you dial the preprogrammed emergency number, 911.
It also operates in the lock mode and out of the service area.

911 IN LOCK MODE

The 911 call service is available even in the lock mode.

1 Enter "911" then press 📞 .

2 The call connects.

3 The phone maintains the Emergency call Mode for 5 minutes.

- When the call ends, the phone returns to the Lock Mode.

911 USING ANY AVAILABLE SYSTEM

1 Enter "911" then press 📞 .

2 The call connects.

3 The phone maintains the Emergency Mode for 5 minutes.

- The phone continuously attempts to receive or outgoing call service from any available system.

C
H
2

Chapter 3

MEMORY FUNCTION

This chapter addresses memory functions including:

- STORING A PHONE NUMBER
- ENTERING LETTERS, NUMBERS & SYMBOLS

The Contacts stores up to 300 entries.

1 Enter phone number then press (OK) [SAVE].

2 Choose "New contact" or "Existing contact". Press (OK) [OK] to select.

3 If "New contact" is selected, the phone # will appear above a list of icons. The name of the icon is displayed below the list.
Press the Navigation Key left or right to choose the type of # you're adding, as indicated by the icon. Press (OK) [OK] to select.
If "Existing contact" is selected, the Find screen will appear. Select the contact name you are editing then press (OK) [OK]. The new number will appear above the list of icons. Select the type of # you're adding then press (OK) [OK].

4 Enter a name or edit the existing name.
Please refer to page 31 for more details on entering letters, numbers & symbols.
To change the input mode, press ⊟ [Abc].
Press the Navigation Key down to enter information into the additional fields.

- Group : Personal, Business & Etc
- Ringtone.
- Graphic.
- Msg Tones.
- Set Secret : Lock, Unlock.
- The other fields are set to Numeric mode as a default.

5 To store the entry, press (OK) [SAVE].
"New contact added" or "Contact edited" will be displayed.

CH 3

The input mode (Alpha editor) will be automatically activated when necessary to enter letters and numbers. As shown below, there are 4 available modes: Standard input mode (Abc), T9 input mode (T9Word), Numeric mode (NUM), and Symbol mode (Symbols).

The input mode indicator appears on the lower right of the display when letters and numbers are entered. To select the desired input mode among the 4 modes below, press ⊟ [MODE], then enter letters and numbers.

CH 3

Input mode indicator
T9Word : T9 mode
Abc : Abc mode
123 : Numeric mode (123)
Symbols : Symbol mode

The following illustrates the function assigned to each key in the Alpha Editor.

KEY	FUNCTION
⊟ Mode	Press to change mode. [T9Word][Abc][NUM][Symbols]
0 Next	Press to view the next matching word if the highlighted word is not the word you intended.
# Space	Press to accept a word and add a space.
* Caps Lock	Press to select a letter case of the standard text input or T9 text input mode. [Abc], [ABC], and [abc] indicate the standard text input. [T9Word], [T9WORD], and [T9word] indicate the predictive text input.
Clear [Back]	Press to delete a character to the left of the cursor.

STANDARD INPUT MODE

Use the digit keys to enter letters, numbers and characters.

1 Enter letters using the key pad as follows:

Key Pad	1 Time	Repetitions 2 times	Repetitions 3 times	Repetitions 4 times	Repetitions 5 times
1	.	@	-	'	...
2ABC	A	B	C	2	A
3DEF	D	E	F	3	D
4GHI	G	H	I	4	G
:	:	:	:	:	:
9WXYZ	W	X	Y	Z	9

To change the input mode, press ⊟ [Abc].

2 To enter a space, press ⌗ . The cursor will automatically move to the next column.

3 Repeat until all letters are entered. Text Messages have a 160-character limit.

4 To delete one digit, press ⌫ . To delete the entire entry, press and hold ⌫ .

5 To change from lowercase to uppercase, press ✳ .

e.g. *Select Abc mode by pressing ⊟ [Abc].*
When you select this mode, the Abc icon appears as a visual confirmation.
- Find the key that corresponds to the letter you want to enter.
- Press it as many times as needed for the letter to appear on the screen.
- To enter the name "John" :
  Press [5]   J
  Press [6 6 6]   o
  Press [4 4]   h
  Press [6 6]   n

T9 INPUT MODE

The T9 input mode incorporates a built-in-dictionary to determine a word based on the entered characters. A word can be entered more quickly by pressing a key once per character.

1 Select the T9Word mode by pressing ⊟ [Abc].

2 Press a digit key once to enter the character you want then enter all the characters to input the word you want.

3 To view the next matching word, press 0 .

4 To accept the matching word then enter a space, press ⌗ .

NOTE *To enter a compound word:*
•   Enter the first part of the word then press ⊙ ➡ to accept it.
•   Enter the last part of the word then press ⌗ to enter the word.

e.g. *To enter "Hilltop" in the T9 input mode:*

- Press ⊟ [Abc] to select the T9 input mode and ✳ to choose the small letter case (T9Word).

- Press 4 4 5 5 and you will see "Hill" highlighted. Press ⊙ ➡ to select it.

- Press 8 6 7 and you will see "top" highlighted. Press ⊙ ➡ to select it.

CH 3

NUMERIC MODE

Allows you to enter numbers.

1 To enter Numeric Mode, press ⊟ [Abc] then select "123".

2 To enter a number, press a digit key.

C
H
3

SYMBOL MODE

Allows you to enter symbols.

1 To enter Symbol Mode, press ⊟ [Abc] then select "Symbols".

2 Select the symbol you want to enter with the Navigation Key.

● Use the Navigation Key to view a different line of symbols.

Press [⬅ 🔘 ➡],

or

Press [🔘].

TAKE A PICTURE

Taking pictures with your phone's built-in camera is as simple as choosing a subject, pointing the lens, then pressing a button.

TAKING A PICTURE THROUGH THE MENU

1 Press ⌐ [MENU] 📷 📷 .

2 Point the camera lens at your subject.
You can check the picture framing through the main display screen.

3 To take the picture, press ⊙ [OK] or the Side Camera Key.

4 To send the picture to someone, press ⊙ [SEND].
To save the picture, press ⌐ [SAVE].

> ● You can receive a call while in the Camera Mode, but not when sending a picture to someone. When this occurs, all incoming calls will be automatically forwarded to voicemail.

TAKING A PICTURE IN IDLE MODE

1 To activate Camera Mode, press and hold the Side Camera Key or press and hold 📷 .

2 Point the camera lens at your subject.
You can check the picture framing through the main display screen.

3 To take the picture, press the Side Camera Key.

4 To send the picture to someone, press ⊙ [SEND].
To save the picture, press ⌐ [SAVE].

TAKING A PICTURE WITH THE PHONE CLOSED

This is perfect for taking self-portraits.

1 To activate Camera Mode, press and hold the Side Camera Key.

2 Point the camera lens at your subject.
You can check the picture framing through the sub display screen.

3 To take the picture, press the Side Camera Key.

CH 4

CAMERA MODE OPTIONS

When the phone is open and in Camera Mode, several user options are available.

RESOLUTION

Press the Navigation Key up or down to adjust the picture size from High (480x640 pixels), Med (240x320 pixels), Low (120x160 pixels). The current picture size appears at the top left of the display screen.

ZOOM

Press the Navigation Key left or right to change the magnification. (Zoom to 1x, 2x or 4x magnification.). The Zoom Magnification appears at the top right of the display screen.

UNDER ⊖ [OPTIONS]

1. SELF PORTRAIT

Switch the viewfinder to the Sub LCD. (Take a picture of yourself by checking the view on the Sub LCD.)

2. ADD A FRAME

Select your favorite fun picture frame to decorate your picture by pressing the Navigation Key left or right, press ⊖ [SELECT]. (Off / Blue frame / Eyes / Fauna / Flowers / Geese / Her thoughts / Hex / His thoughts / Limo / One eye / Orange frame / Pinky / Rising / Spade / Stripey / TV / Virgin Mobile / Wild eyes / Yellow frame)

3. FLASH

Activate the flash function. (On this shot / Always on / Off)

4. SELF TIMER

Activate the camera's timer function. (5 Secs / 10 Secs / Off)

5. PIC CONTROLS

Adjust your picture using the following options:
(Brightness / Image effect / Quality / Contrast)

6. SHUTTER SOUND

Select a shutter sound. (Classic / Say "Cheese" / Ready 123)

CH 4

● MY PICTURES

1 Press ⊖ [MENU] 📞 2ABC or press 📷 2ABC .

2 Select one of the following options with the Navigation Key, then press ⊙ℝ [OK].

- Pictures taken: To view photos you have captured with your camera.
- Pictures received: To view the folder storing pictures you have downloaded or assigned.

3 To access the "Pictures taken" options menu, press ⊖ [OPTIONS].

- Assign: To assign the selected picture to display for specific tasks: (Contacts / Wallpaper / Incoming call / Screensaver)
- My Pix: To select an option to upload pictures saved in your phone to the Picture Mail Website.
- Take pic: To return to Camera Mode to take another picture.
- Erase: To erase selected pictures, select an option and then press ⊙ℝ [OK].
- Erase all: To erase all pictures.
- Edit title: To enter or edit a title for the picture.
- Pic information: To display picture information such as title, time/date, size, etc.

To access the "Pictures received" options menu, press ⊖ [OPTIONS].

- Assign: To assign the selected picture to display for specific tasks: (Picture ID / Screensaver / Incoming call)
- Erase: Erase the current picture from your mobile phone.
- Erase all: To erase all pictures.

4 To access "Send picture msg" from the "Pictures taken" menu, press ⊖ [SEND].

CH 4

SEND PICTURE MSG

Once you've taken a picture, you can use the messaging capabilities of your phone to instantly share it with family and friends. To send a picture to a recipient's email address or to a Virgin Mobile camera phone:

1 Press ⊡ [MENU] 🔁 ③ .

2 The "Pictures taken" menu appears with all the saved picture thumbnails. Scroll through the captured pictures to select the picture you want to send, then press 🆗 [OK].
Press ⊡ [OPTIONS] to select "Picture received" or "My Pix" by pressing the Navigation Key then press 🆗 [OK].

3 Under "Send To", enter the email address or mobile phone number and press 🆗 [OK].
Press ⊡ [OPTIONS] to select 1. Contacts, 2. My Pix, 3. Text Mode: 123, 4. Msg Group, 5. Save Contact. Press ⊟ [RECENT] to choose a recently used number or email address.

4 Under "Subject", enter a subject line for the message. Press 🆗 [OK].

5 Under "Message". The picture will come up underneath the flashing cursor.
Enter the message and press 🆗 [OK].
Press ⊡ [OPTIONS] to 1. Record Voice, 2. Insert voice memo, 3. Insert Auto text, 4. Save to Auto text or 5. Erase pic.

6 To send the picture, press ⊟ [SEND].

Please refer to page 98 for more details on "Send picture msg".

HELP

1 Press ⊡ [MENU] 🔁 ④ .

● Use up/down keys to change picture size, left/right keys to change zoom and Side up/down keys control rotation on preview mode.
Camera menu provides more settings:
1. Self portrait: Enable previewing on external LCD.
2. Add a frames: Choose from 19 different frames to make picture taking fun.
3. Flash: Provides just enough light to allow pictures to be taken.
4. Self timer: Set timer to take a self portrait.
5. Pic controls
    5.1 Brightness
    5.2 Image effect
    5.3 Quality
    5.4 Contrast
6. Shutter sound: Select a sound to use for shutter.

CH 4

CH 4

MY ACCOUNT

You can manage your Virgin Mobile account from your phone. The basic tasks are summarized below. For more information about your Virgin Mobile account, visit www.virginmobileusa.com.

CHECKING YOUR ACCOUNT BALANCE

You can check the amount of money remaining in your Virgin Mobile account right from your phone.

1 From the main screen, press ⊟ [MENU] 2ᴬᴮᶜ "My Account" or press the Navigation Key up.

TOP-UP YOUR ACCOUNT

Top-Up is how you add money to your Virgin Mobile account. You can Top-Up your account right from your phone, but first you'll have to buy a Top-Up card from one of the thousands of stores that carry them or register a debit or credit card with Virgin Mobile.

1 Press ⊟ [MENU] 2ᴬᴮᶜ "My Account".

2 Press ⊙ₖ [OK] to proceed.

MY STUFF

Your Snapper phone provides a unique feature - My Stuff - that enables you to download games, ringtones, images, applications and more from Virgin Mobile's network to your mobile phone. For more information, go to www.virginmobileusa.com.

START MY STUFF

1 To launch "My Stuff" from the standby mode, press ⊟ [MENU] 5ᴶᴷᴸ .

2 Choose one of the menu options:

● My ringtones
● My games
● My other stuff
● My graphics
● My sounds

3 To view the amount of memory free and used, press ⊟ [MEMORY].

4 To end the application, press 📞 . The phone will return to the standby mode.

MY RINGTONES

You can download the latest ringtones right to your phone. Charges apply. Visit www.virginmobileusa.com for details.

1 Press ⊟ [MENU] 5ᴶᴷˡ 1⊠ .

2 Select "Get more ringtones" then press ⟨ᴏᴋ⟩ [GO]. You will be taken to the "My ringtones" download menu.

3 Use the Navigation Key to select the ringtones you wish to download.

4 From the item information page, select "Buy".

5 A confirmation page will notify you that the ringtone has been purchased. To download the ringtone, select "Download".

NOTE

- *Your phone comes with 5 pre-loaded ringtones: Hey Baby, Metal, Scratchin, Synth, and Jingle. Press ⊟ [ASSIGN] to assign to a contact or as your incoming call ringtone.*
- *Downloaded ringtones will be stored in your phone's My Ringtones folder.*

MY GAMES

You can download the latest games and play them right on your phone. Charges apply. Visit www.virginmobileusa.com for details.

1 Press ⊟ [MENU] 5ᴶᴷˡ 2ᴬᴮᶜ .

2 Select "Get more games" then press ⟨ᴏᴋ⟩ [GO]. You will be taken to the "My games" download menu.

3 Use the Navigation Key to select the game you wish to download.

4 From the item information page, select "Buy".

5 A confirmation page will notify you that the game has been purchased. To download the game, select "Download".

NOTE

- *Your phone comes with 2 pre-loaded demo games: THUG2 and Bejeweled. You can purchase the full version of each after playing the demo.*
- *Downloaded games will be stored in your phone's My Games folder.*

>   phone and follow the Answer Mode you have selected.

AUTO ANSWER

To answer calls when your Snapper is connected to an optional hands-free car kit or headset:

1 Press 🔲 [MENU] 9ʷˣʸᶻ 3ᴰᴱꜰ 3ᴰᴱꜰ .

2 Select one of the following options then press 🆗 [OK].

> Off / 5 Secs / 10 Secs / 18 Secs

> **NOTE**
> *This function will not be active when you select "Ringtone off".*
> *Except "Ringtone off", Auto Answer shall be active in any other case.*
> *More specifically,*
> *• If headset is connected, Auto Answer will be active.*
> *• If headset is not connected and flip is closed, Auto Answer will not be active.*
> *• If headset is not connected and flip is open, Auto Answer will be active except "Ringtone Off" mode.*

AUTO RETRY

Automatically redial a call up to 5 times after a set time interval.

1 Press 🔲 [MENU] 9ʷˣʸᶻ 3ᴰᴱꜰ 4ᴳᴴᴵ .

2 Select a retry time option (Off, 3 Secs, 5 Secs, 7 Secs, 10 Secs). The Repeat Category will appear when a time frame is chosen.

3 Under Repeat, select a time interval option (1 Time, 3 Times, 5 Times).

> **NOTE**
> *When Redial Time is set to "Off", the "Repeat" field disappears.*

4 To save, press 🆗 [OK].

LOCATION

Your cellular telephone is equipped with a Location feature for use in connection with location-based services that may be available in the future. The Location feature allows the network to detect your position. Turning Location off will hide your location from everyone except 911.

1 Press 🔲 [MENU] 9ʷˣʸᶻ 3ᴰᴱꜰ 5ᴶᴷᴸ .

2 Select either "911 only" or "Location on" with the Navigation Key then press 🆗 [OK].

TTY

A TTY (also known as a TDD or Text Telephone), is a telecommunications device that allows people who are deaf or hard of hearing, or who have speech or language disabilities, to communicate via telephone.
Your Snapper is compatible with select TTY devices. Please check with the manufacturer of your TTY device to ensure that it supports digital wireless transmission. Your Snapper and TTY device will connect via special cable that plugs into your phone's headset jack. If this cable was not provided with your TTY device, contact your TTY device manufacturer to purchase the connector cable.

1 Press 🔲 [MENU] 9ʷˣʸᶻ 3ᴰᴱꜰ 6ᴹᴺᴼ .

2 Select either "Enable TTY" or "Disable TTY" with the Navigation Key then press 🆗 [OK].

CH 4

GAME SETTINGS

BACKLIGHT

While playing a game, select how long the display screen and keypad are backlit after pressing any key.

1 Press ⊟ [MENU] 9️⃣ 4️⃣ 1️⃣ .

2 Select one of the following options, then press (OK) [OK].

● 5 Secs / 15 Secs / 30 Secs / 60 Secs / Always On

VOLUME

Controls game volume while playing.

1 Press ⊟ [MENU] 9️⃣ 4️⃣ 2️⃣ .

2 Select one of the following options, then press (OK) [OK].

Chapter 7

SAFETY AND WARRANTY

This chapter addresses the safety guidelines and precautions to follow when operating your cellular telephone. Before operating your cellular telephone, please be aware of all the safety details.

This chapter contains the terms and conditions of services and the warranty for your cellular telephone. Please review them thoroughly.

■ SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES

■ SAFETY INFORMATION FOR FCC RF EXPOSURE

■ SAR INFORMATION

■ FDA CONSUMER UPDATE

■ PROTECT YOUR WARRANTY

■ 12 MONTH LIMITED WARRANTY

CH
7

Read This Information Before Using Your Handheld Portable Cellular Telephone

EXPOSURE TO RADIO FREQUENCY SIGNALS

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals.

In August 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

> ANSI C95.1 (1992) *
> NCRP Report 86 (1986) *
> ICNIRP (1996) *

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C951).

The design of your cellular telephone complies with the FCC guidelines (and those standards).

ANTENNA CARE

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

1* : American National Standards Institute.
2* : National Council on Radiation protection and measurements.
3* : International Commission on Nonionizing Radiation Protection.

DRIVING SAFETY

Talking on the phone while driving is extremely dangerous and is illegal in some areas. Remember, safety comes first. Check the laws and regulations on the use of phones in the areas where you drive. Always obey them.

Also, if using your cellular telephone while driving, please:

- Give full attention to driving. Driving safely is your first responsibility.

- Use hands-free operation, if available.

- Pull off the road and park before making or answering a call, if driving conditions so require.

If you must use the phone while driving, please use one-touch, speed dialing, and auto answer modes.

An airbag inflates with great force. DO NOT place objects, including both installed or portable wireless equipment, in the area over the airbag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

> **(!)** **WARNING:** *Failure to follow these instructions may lead to serious personal injury and possible property damage.*

ELECTRONIC DEVICES

Most modern electronic equipment is shielded from RF energy. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

PACEMAKERS

The Health Industry Manufacturers Association recommends that a minimum separation of six (6") inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. Persons with pacemakers :

● ALWAYS keep the phone more than six inches from your pacemaker when the phone is turned on.

● Do not carry the phone in a breast pocket.

● Use the ear opposite the pacemaker to minimize the potential for interference.

● If you have any reason to suspect that interference is taking place, turn your cellular telephone OFF immediately.

OTHER MEDICAL DEVICES

If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your cellular telephone OFF in healthcare facilities when any regulations posted in these areas instruct you to do so. Hospitals or healthcare facilities may be using equipment that could be sensitive to external RF energy.

POSTED FACILITIES

Turn your cellular telephone OFF where posted notices so require.

C
H
7

OTHER SAFETY GUIDELINES

AIRCRAFT

FCC and Transport Canada Regulations prohibit using your cellular telephone while in the air. Turn your cellular telephone OFF before boarding an aircraft.

BLASTING AREAS

To avoid interfering with blasting operations, turn your cellular telephone OFF when in a "blasting area" or in areas posted: "Turn off two-way radio." Obey all signs and instructions.

POTENTIALLY EXPLOSIVE ATMOSPHERES

Turn your cellular telephone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include fueling areas such as gas stations; below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust, or metal powders; and any other area where you would normally be advised to turn off your vehicle's engine.

SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES

PRECAUTIONS

Your Handheld Portable Telephone is a high quality piece of equipment. Before operating, read all instructions and cautionary markings on (1) AC Adaptor (2) Battery and (3) Product Using Battery.

DO NOT use this equipment in an extreme environment where high temperature or high humidity exists.

DO NOT abuse the equipment. Avoid striking, shaking or shocking. When not using, lay down the unit to avoid possible damage due to instability.

DO NOT expose this equipment to rain or spilled beverages.

DO NOT use unauthorized accessories.

DO NOT disassemble the phone or its accessories. If service or repair is required, return unit to an authorized Audiovox cellular service center. If unit is disassembled, the risk of electric shock or fire may result.

DO NOT short-circuit the battery terminals with metal items etc.

> **WARNING!**
> • This product contains a chemical known to the State of California to cause cancer.
> • This product contains a chemical known to the State of California to cause birth defects or other reproductive harm.

SAFETY INFORMATION FOR FCC RF EXPOSURE

WARNING! Read this Information before using

CAUTIONS

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.
Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations.
Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

BODY-WORN OPERATION

This device was tested for typical body-worn operations with the back of the phone kept 2.0 cm. from the body. To maintain compliance with FCC RF exposure requirements, use only belt-clips, holsters or similar accessories that maintain a 2.0 cm. separation distance between the user's body and the back of the phone, including the antenna. The use of belt-clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

VEHICLE MOUNTED EXTERNAL ANTENNA (OPTIONAL, IF AVAILABLE)

A minimum separation distance of 7.9 inches (20cm) must be maintained between the user/bystander and the vehicle mounted external antenna to satisfy FCC RF exposure requirements.

> **NOTE**
> For more information about RF exposure, please visit the FCC website at www.fcc.gov.

THIS MODEL PHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 1.15 W/Kg and when worn on the body, as described in this user guide, is 0.393W/Kg. (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/ oet/fccid after searching on PP4TX-110C.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) website at http://www.wow-com.com.

* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a sub-stantial margin of safety to give additional protection for the public and to account for any variations in measurements.

U.S. Food and Drug Administration -Center for Devices and Radiological Health Consumer Update on Wireless Phones

1. Do wireless phones pose a health hazard?
The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of radiofrequency energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the stand-by mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

2. What is FDA's role concerning the safety of wireless phones?
Under the law, FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit radiofrequency energy (RF) at a level that is hazardous to the user. In such a case, FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace or recall the phones so that the hazard no longer exists. Although the existing scientific data do not justify FDA regulatory actions, FDA has urged the wireless phone industry to take a number of steps, including the following:
• Support needed research into possible biological effects of RF of the type emitted by wireless phones;
• Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function;
and
• Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.
FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:
• National Institute for Occupational Safety and Health
• Environmental Protection Agency
• Federal Communications Commission
• Occupational Safety and Health Administration
• National Telecommunications and Information Administration
The National Institutes of Health participates in some inter-agency working group activities, as well. FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. FCC relies on FDA and other health agencies for safety questions about wireless phones. FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations are thus not the subject of the safety questions discussed in this document.

3. What kinds of phones are the subject of this update?
The term "wireless phone" refers here to hand-held wireless phones with built-in antennas, often called "cell," "mobile," or "PCS" phones.

These types of wireless phones can expose the user to measurable radiofrequency energy (RF) because of the short distance between the phone and the user's head. These RF exposures are limited by Federal Communications Commission safety guidelines that were developed with the advice of FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person's RF exposure decreases rapidly with increasing distance from the source. The so-called "cordless phones," which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures far below the FCC safety limits.

4. What are the results of the research done already?
The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radiofrequency energy (RF) exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor development used animals that had been genetically engineered or treated with cancer-causing chemicals so as to be pre-disposed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we don't know with certainty what the results of such studies mean for human health. Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phone RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.

5. What research is needed to decide whether RF exposure from wireless phones poses a health risk?
A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but 10 or more years' follow-up may be needed to provide answers about some health effects, such as cancer. This is because the interval between the time of exposure to a cancer- causing agent and the time tumors develop - if they do -may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

6. What is FDA doing to find out more about the possible health effects of wireless phone RF?
FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to radiofrequency energy (RF). FDA has been a leading participant in the World Health Organization International Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world.

CH7
CH7

The Project has also helped develop a series of public information documents on EMF issues. FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research and Development Agreement (CRADA) to do research on wireless phone safety. FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic or-ganizations. CTIA-funded research is conducted through contracts to independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

7. How can I find out how much radiofrequency energy exposure I can get by using my wireless phone?
All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit radiofrequency energy (RF) exposures. FCC established these guidelines in consultation with FDA and the other federal health and safety agencies. The FCC limit for RF exposure from wireless telephones is set at a Specific Absorption Rate (SAR) of 1.6 watts per kilogram (1.6 W/kg). The FCC limit is consistent with the safety standards developed by the Institute of Electrical and Electronic Engineering (IEEE) and the National Council on Radiation Protection and Measurement. The exposure limit takes into consideration the body's ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects. Manufacturers of wireless phones must report the RF exposure level for each model of phone to the FCC. The FCC website (http://www.fcc.gov/oet/rfsafety) gives directions for locating the FCC identification number on your cellular telephone so you can find your phone's RF exposure level in the online listing.

8. What has FDA done to measure the radiofrequency energy coming from wireless phones ?
The Institute of Electrical and Electronic Engineers (IEEE) is developing a technical standard for measuring the radiofrequency energy (RF) exposure from wireless phones and other wireless handsets with the participation and leader-ship of FDA scientists and engineers. The standard, "Recommended Practice for Determining the Spatial-Peak Specific Absorption Rate (SAR) in the Human Body Due to Wireless Communications Devices: Experimental Techniques," sets forth the first consistent test methodology for measuring the rate at which RF is deposited in the heads of wireless phone users. The test method uses a tissue-simulating model of the human head. Standardized SAR test methodology is expected to greatly improve the consistency of measurements made at different laboratories on the same phone. SAR is the measurement of the amount of energy absorbed in tissue, either by the whole body or a small part of the body. It is measured in watts/kg (or milliwatts/g) of matter. This measurement is used to determine whether a wireless phone complies with safety guidelines.

9. What steps can I take to reduce my exposure to radiofrequency energy from my wireless phone?
If there is a risk from these products—and at this point we do not know that there is—it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to radiofrequency energy (RF). Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure.
• If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna.

Again, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

10.What about children using wireless phones?
The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radiofrequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure. Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that us-ing a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

11.What about wireless phone interference with medical equipment?
Radiofrequency energy (RF) from wireless phones can interact with some electronic devices. For this reason, FDA helped develop a detailed test method to measure electromagnetic interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical instrumentation (AAMI). The final draft, a joint effort by FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI. FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that that no interference occurs when a person uses a "compatible" phone and a "compatible" hearing aid at the same time. This standard was approved by the IEEE in 2000. FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, FDA will conduct testing to assess the interference and work to resolve the problem.

12.Where can I find additional information?
For additional information, please refer to the following resources:
• FDA web page on wireless phones (http://www.fda.gov/cdrh/ phones/index.html)
• Federal Communications Commission (FCC) RF Safety Program (http://www.fcc.gov/oet/rfsafety)
• International Commission on Non-Ionizing Radiation Protection (http://www.icnirp.de)
• World Health Organization (WHO) International EMF Project (http://www.who.int/emf)
• National Radiological Protection Board (UK) (http://www.nrpb.org.uk/)

Read your Warranty carefully, with the special consideration to paragraph seven of the Limited Warranty for your unit.

"Warranty does not apply to... or to any product or part thereof which has suffered through alteration... mishandling misuse, neglect or accident".

Many companies are making look alike accessories and in some cases, promoting that their product is equal to or better than the Audiovox product. Be careful. Some of these products may not be compatible to use with your Audiovox product and may damage the unit or cause it to malfunction. If service is required on your unit and it is determined that a non-Audiovox accessory has created the problem with your unit, the Warranty will not apply. In addition, if the unit has already suffered irreversible damage by reason of a non-compatible accessory, the Warranty will be voided. To protect your Warranty, use only compatible accessories which cannot damage or interfere with the functioning of your Audiovox product.

AUDIOVOX

UTSTARCOM/AUDIOVOX COMMUNICATIONS
555 Wireless Blvd., Hauppauge, New York 11788, 800-229-1235
16808 Marquardt Avenue, Cerritos, California 90703, 562-802-5100
UTStarcom Canada Company
5155 Spectrum Way, Unit #5, Mississauga, Ontario
Canada L4W 5A1, 800-465-9672

CH7

UTStarcom/Audiovox Communications (the Company) warrants to the original retail purchaser of this Audiovox handheld portable cellular telephone, that should this product or any part thereof during normal consumer usage and conditions, be proven defective in material or workmanship that results in product failure within the first twelve (12) months period from the date of purchase, such defect(s) will be repaired or replaced (with new or rebuilt parts) at the Company's option, without charge for parts or labor directly related to the defect(s).

The antenna, key pad, display, rechargeable battery and battery charger, if included, are similarly warranted for twelve (12) months from date of purchase.

This Warranty extends only to consumers who purchase the product in the United States or Canada and it is not transferable or assignable.

This Warranty does not apply to:

(a) Product subjected to abnormal use or conditions, accident, mishandling, neglect, unauthorized alteration, misuse, improper installation or repair or improper storage;

(b) Product whose mechanical serial number or electronic serial number has been removed, altered or defaced.

(c) Damage from exposure to moisture, humidity, excessive temperatures or extreme environmental conditions;

(d) Damage resulting from connection to, or use of any accessory or other product not approved or authorized by the Company;

(e) Defects in appearance, cosmetic, decorative or structural items such as framing and non-operative parts;

(f) Product damaged from external causes such as fire, flooding, dirt, sand, weather conditions, battery leakage, blown fuse, theft or improper usage of any electrical source.

The Company disclaims liability for removal or reinstallation of the product, for geographic coverage, for inadequate signal reception by the antenna or for communications range or operation of the cellular system as a whole.

To obtain repairs or replacement within the terms of this Warranty, the product should be delivered with proof of Warranty coverage (e.g. dated bill of sale), the consumer's return address, daytime phone number and/or fax number and complete description of the problem, transportation prepaid, to the Company at the address shown below or to the place of purchase for repair or replacement processing.

CH7

12 MONTH LIMITED WARRANTY

In addition, for reference to an authorized Warranty station in your area, you may telephone in the United States (800) 229-1235, and in Canada (800) 465-9672 (in Ontario call 905-712-9299).

THE EXTENT OF THE COMPANY'S LIABILITY UNDER THIS WARRANTY IS LIMITED TO THE REPAIR OR REPLACEMENT PROVIDED ABOVE AND, IN NO EVENT, SHALL THE COMPANY'S LAIBILITY EXCEED THE PURCHASE PRICE PAID BY PURCHASER FOR THE PRODUCT.

ANY IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, SHALL BE LIMITED TO THE DURATION OF THIS WRITTEN WARRANTY. ANY ACTION FOR BREACH OF ANY WARRANTY MUST BE BROUGHT WITHIN A PERIOD OF 18 MONTHS FROM DATE OF ORIGINAL PURCHASE. IN NO CASE SHALL THE COMPANY BE LIABLE FOR AN SPECIAL CONSEQUENTIAL OR INCIDENTAL DAMAGES FOR BREACH OF THIS OR ANY OTHER WARRANTY, EXPRESS OR IMPLIED, WHATSOEVER. THE COMPANY SHALL NOT BE LIABLE FOR THE DELAY IN RENDERING SERVICE UNDER THIS WARRANTY OR LOSS OF USE DURING THE TIME THE PRODUCT IS BEING REPAIRED OR REPLACED.

No person or representative is authorized to assume for the Company any liability other than expressed herein in connection with the sale of this product.

Some states or provinces do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damage so the above limitation or exclusions may not apply to you. This Warranty gives you specific legal rights, and you may also have other rights which vary from state to state or province to province.
